

EXTERIOR SIGNS

Every day, throughout the world we all receive information conveyed by a multitude of signs, be they directional, promotional or informative – they all communicate.

At Harrisons we realise it takes a certain amount of skill and flair to stand out above the rest, and our experienced team can offer extensive advice on layout, design and the wide range of products available, as well as any potential planning restrictions.

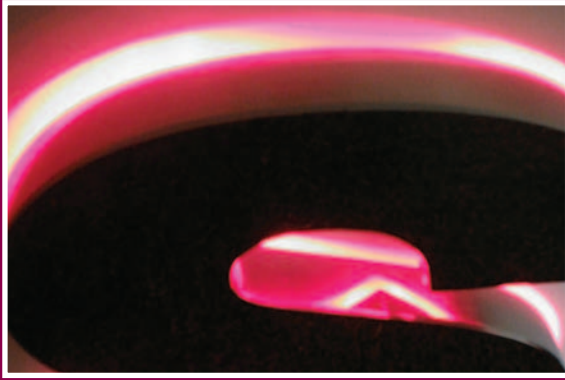

Whether a single sign or a full corporate re-brand, requiring either local or national installation, let Harrisons communicate your business to the world outside.

Our Services Include:

- Corporate Re-branding
- Retail Signage
- Directional & Wayfinding
- Window Graphics
- Health & Safety Signs
- Hazard Warning Signs
- Illuminated Signs
- Built-up Letters
- Posters & Banners
- Wide Format Digital Print

Rhodar Sign

Illuminated Signs

Signs play an important part in how a company is perceived in the marketplace, whether by its customers, suppliers, staff or even its competitors. An attractive, attention grabbing frontage helps engage the viewer and makes a powerful statement about your business. At Harrisons we offer a broad range of methods for illuminating your sign and increasing the visibility of your company, including light-boxes, spotlighting and LED halo effect lighting.

Posts Systems

We supply post-mounted signs to give a consistent corporate identity across any number of sites, locally or nationally. We combine your ideas with our skills and knowledge to identify the best system for your requirements and produce a sign individually tailored to your needs.

Directional Signs

Our directional sign systems provide clear, consistent, readable information. Our hard-wearing, interchangeable aluminium systems give you the flexibility to add or remove information at a later date, and they are available in a wide choice of finishes and colours.

Large Format Graphic Signs

If you need to "go-large", we can do it! Our wide-format printers use UV stable inks allowing us to create weatherproof full colour prints that can be applied and mounted using a huge variety of durable printable media and fixings.
