Introduction

Fitting Service

We fit nationwide. Our friendly, trained installers will work around you minimising any disruption to your work day.

Fitting is quoted based on each individual jobs' requirements. Get in touch for a quote.

Standard Paper Sizes

A4 = 210mm x 297mm

A3 = 297mm x 420mm

A2 = 420mm x 594mm

A1 = 594mm x 841mm

A0 = 841mm x 1189mm

Ordering & Design

Within this brochure, you will find all the products, parts and information necessary to create stunning window/wall displays.

In order to keep things as simple as possible we offer a design service. This can be as simple as a line drawing to confirm how many panels will fit into your available space before you commit to placing your order.

Or email us with your requirements together with photos of your window/wall along with dimensions. We will provide a written estimate and stunning 3D visuals to give you a clear idea of what your new display will look like.

Line Drawing

3D CAD Visual
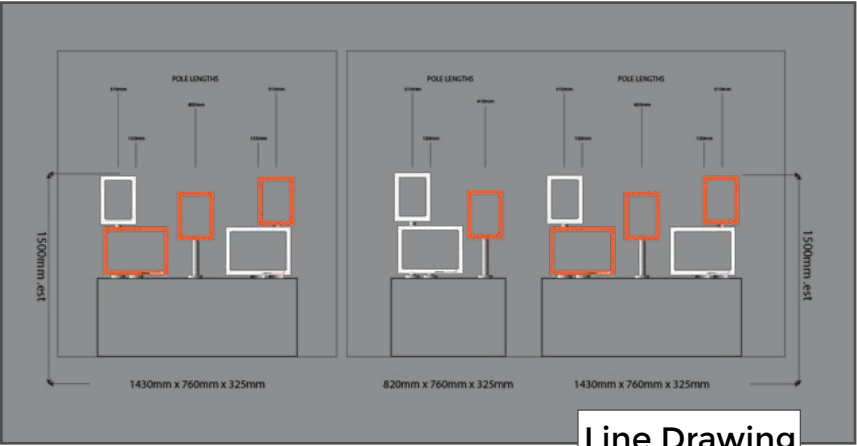

Bespoke Design

We can customise many of our standard products with logos & colour options.

However if your require something completely different please get in touch.

As a manufacturer we can design, prototype & build to your own requirements.

LEDs

Our LEDs are very bright and emit a warm white light that will enhance your graphics.

They are low energy with a life expectancy of 30,000 - 60,000 hours, making them suitable to be used day & night.

We recommend Back Lit Paper in our LED displays. This paper is suitable for use in most desktop printers (speak to your printer provider for advice). Satin finish paper can also be used however the grain of the paper will be visible.

Please note that when we state 'Size' we are referring to the paper size not the overall space that a panel requires.

Acrylic

Caring for your acrylic display is easy if you follow these simple rules:

DO NOT clean with polish of any kind.

DO use a sponge cloth (available in most supermarkets) with warm water only. Rinse out first then wring out the water so the cloth is barely damp, this will remove any dust, streaks or fingerprints from your acrylic.

All light panel orders come with an instruction care pack.
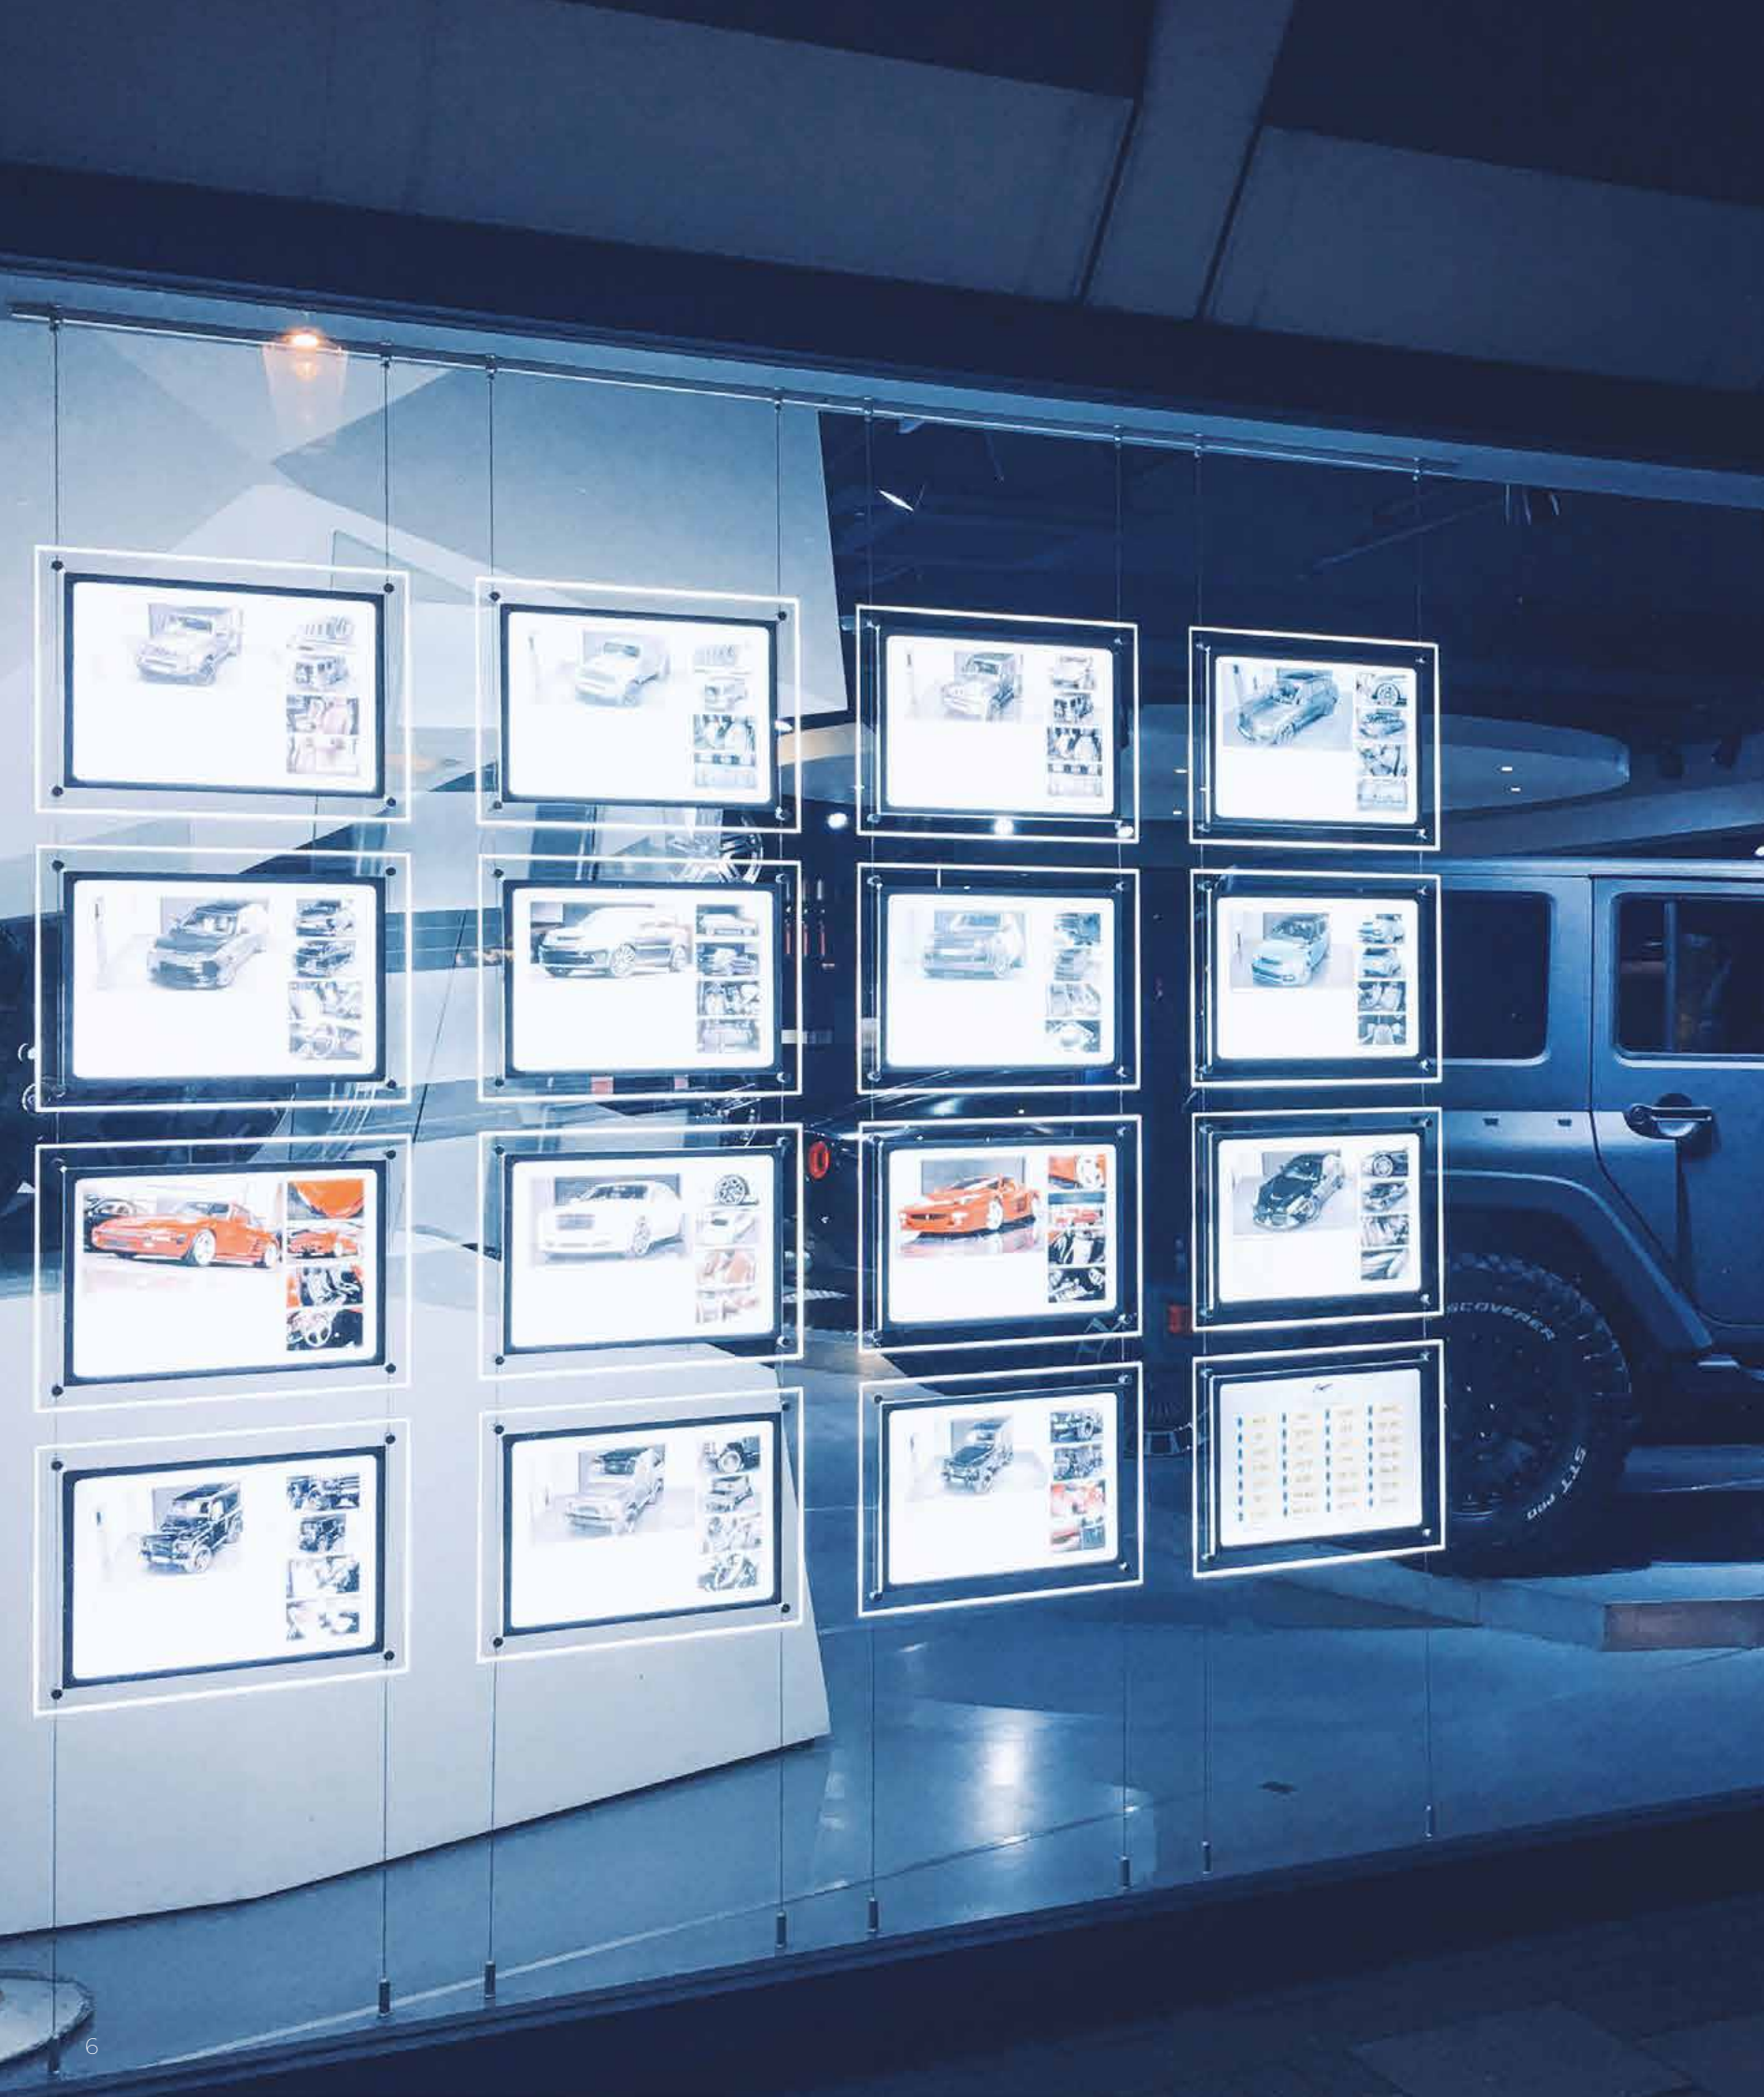

LED DISPLAYS

Our smart bevelled design means no dark shadow and an even distribution of light. The micro bevelled range means less border, greater display impact.

We use maintenance-free low energy LEDs with a minimum life expectancy of 30,000 to 60,000 hours. NO SPECIALIST ELECTRICAL INSTALLATION required. Powered using a 12 volt transformer that plugs directly into the mains.

We are so proud of our the quality of our light panels that every LED lightpocket we sell comes with a 12 month warranty as standard.

Multi LED Light Pocket Kits

Multi pockets work in the same way as our standard range. They are an ideal option where space is limited. There are several pockets on each light panel allowing more graphics to be displayed in a smaller space.

These kits include floor to ceiling 1.5mm cables, double sided acrylic light panels, clamps and transformers — everything you will need!
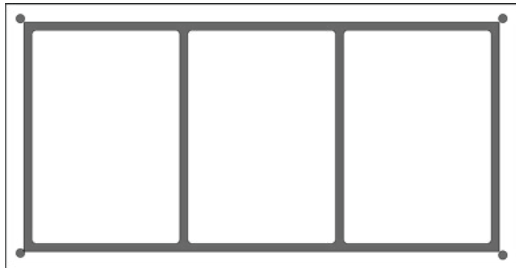

Our standard finish is silver. Other colours available.

Branded Framed Light Pockets

These panels have a wider border (approx. 66mm) to accommodate a logo. The logo can be positioned anywhere on the frame.

As with most of our products the frame can be made to the colour of your choice. Once switched on the LEDs will illuminate your graphic and logo.

Double sided, the fixings are not visible from the 'front' of the panel.

Map Wallpaper

Streets ahead for style! Map wallpaper, bespoke wallpaper and wall coverings are the smart way to add interest to any wall. Our wallpaper offers a high quality finish that will remain colour fast and smear free for a very long time. Fitting is easy – if you can hang wallpaper you can hang our map wallpaper.

- **Easy Hang.** Non-woven paper is much more hard wearing than traditional wallpaper, making it very easy to hang and more durable.
- **Straight match.** Because we print each order to your specific dimensions the drops will always match up.
- **Paste the wall.** By pasting the walls, our wallpapers do not become saturated, resulting in an easy and fast way to put up your wallpaper.
- **Light Fast.** Unlike traditionally printed wallpapers, we guarantee a light fastness for 20 years!
- **Wipeable.** You can wipe down any of our wallpapers with a damp cloth. Our paper is 100% natural (cellulose) and does not have a chemical layer.

Ordering is EASY & you'll receive your wallpaper in days!

HOW IT WORKS.

1. Contact the team today.
2. Let us know the height & width of the wall to be covered.
3. For map wallpaper, tell us the Post Code of the area to be featured & the radius. For other designs we can supply images for you to choose from - just tell us what you want to achieve. We'll tell you the cost & process your order immediately.

Our installation teams are here to help.

DIGITAL DISPLAY

Our selection of top rated digital display screens are hand picked to help you harness the power of digital advertising.

Our commercial grade screens are packed with features to help you deliver dynamic and engaging content in window displays & in stores, sales centres and showrooms. Easy to update and schedule content these screens will help you boost sales, build brand and banish the competition.

Our fully trained staff is on hand to help you choose the right product every time.

Ultra High Brightness Digital Advertising Screens

Keep on marketing even in direct sunlight

Let your window displays shine with our Ultra High Brightness Digital Advertising Screens range.

With a brightness of 2,500cd/m2 these are our brightest ever digital advertising signage displays - the perfect choice when used for displays in direct sunlight.

In addition, these digital displays have been designed to reduce the risk of blackening defects that can occur when the surface temperature of the screen exceeds 110ºC.

Choose from our range of high quality Ultra High Brightness digital posters in sizes 46", 55", 65" and 75" for high impact window advertising displays.

3 Year WARRANTY

Digital Menu Boards

Create mouth-watering digital displays

A digital menu board is the complete all-in-one solution to creating high impact digital displays in your QSR or takeaway.

Our commercial grade LCD screens + Android Network Media Player + 1yr subscription to digital signage software = sales boosting display success.

Don't forget the 3 year warranty & lifetime technical support. With no complicated installation our straight-out-the-box digital menu board is the cost-effective choice.

With a commercial grade IPS panel with a brightness of 450cd/m2 (twice the brightness of domestic televisions) the Digital Menu Board is able to reproduce and maintain the ultimate colour temperature for lifelike images even in the most challenging lighting environments.

With a life span of over 50,000 hours the screen can be in use 24/7 with no loss in image quality. There are no external buttons or controls on the screen to avoid tampering.

Digital Advertising Screens

4K Large Format Screens Now in Stock

Icons: 1,500CD/M2 SUNLIGHT READABLE · 24/7 COMMERCIAL GRADE · TEMPERATURE CONTROL · PLUG AND PLAY · INTEGRATED SPEAKERS · LED BACKLIGHT · LANDSCAPE OR PORTRAIT ORIENTATION · INTEGRATED ANDROID MEDIA PLAYER

Commercial grade professional digital advertising screens at affordable prices

Packed full of features and with a 50,000hr lifespan it's never been easier to add digital to your display. Adding digital displays is a boost for any business and Plug n Play technology means you can be up and running with brilliantly effective promotions and branding in minutes. It's really easy to update content to keeping wowing your customers.

As well as having AV inputs, these displays also have a built in HD media player allowing you to run content copied from a USB drive. Load your pictures and videos onto a USB memory stick then insert it into the display, the screen will then start playing the pictures and videos in a continuous loop.

We have a range of screens sizes to suit available space – and the screens can be used landscape or portrait.

Our screens have been developed to maximise their efficiency – lowering running costs and impact on the environment. The screens reduce power usage by automatically powering off when not needed.

3yr Warranty & Life Time Tech Support

When you invest in digital display for your shop, showroom or salon, it's important to have complete confidence. Our team is fully trained and can offer advice from initial enquiry to after sales. We can arrange installation of your digital screens and our UK team are here to help with any issue.
